Release milestones additional details

Release announcements will be available to customers approximately 180 days before the release effective date.

Important notes

- There are no IPM MPE Full File replacement files (T168 [Test] and T068 [Production]) distributed within Release Q1 and Release Q3. All changes for Release Q1 and Release Q3 are included in the IPM MPE Daily update files T167 (Test) and T067 (Production) and will align to the Mastercard Test Facility (MTF) and Production release dates.
- Mastercard-generated Clearing files may be delayed on the implementation date.
- Dual Message Authorization System release enhancements always phase in gradually on the effective date. Because it takes time to roll out the changes to all MIPs globally, this process may start as early as 01:00 U.S. Central Time / 06:00 UTC and is anticipated to end around 09:00 U.S. Central Time / 15:00 UTC.
- The Single Message System implementation will begin as early as 02:00 U.S. Central Time / 07:00 UTC and normally complete by 05:00 U.S. Central Time / 11:00 UTC on the effective date. Customers may begin seeing new values soon after 02:00 U.S. Central Time / 07:00 UTC when the code is active.
- Refer to the frequently asked questions (FAQs) in the corresponding switching release announcement bundle available on Mastercard Connect[®] for more information.

Milestone details
